

“Creativity is just connecting things. When you ask creative people how they did something, they feel a little guilty because they didn’t really do it, they just saw something. It seemed obvious to them after a while. That’s because they were able to connect experiences they’ve had and synthesize new things.” Steve Jobs

A workshop

We enhance our creativity by drawing on the right side of the brain, writing imaginary stories, discovering the meaning of colours and shapes, dancing one-brain style, and playing creative developmental games.

Ultimately, the exercises we do during the workshop will support you to reconnect with the ‘right side’ of your brain and to develop the attitude of ‘out of the box’ thinking.

During the program we encourage participants to learn how to switch on the right side of their brain (functions of the right hemisphere) and to balance it with the left side creating harmony between the two.
