

“Creativity is just connecting things. When you ask creative people how they did something, they feel a little guilty because they didn’t really do it, they just saw something. It seemed obvious to them after a while. That’s because they were able to connect experiences they’ve had and synthesize new things.” Steve Jobs

'OUT OF THE BOX' workshop series (2) Creativity Tea-Party

Come, free your mind and relax into the magic of doodling and colouring!

Once again, we enhance our creativity by

- drawing on the right side of the brain
- colouring + doodling
- playing word games
- solving visual puzzles
- doing the right-brain dancing
- writing stories and poetry

During the workshop, we expand our horizons; explore and release blockages to our creativity, practice being creative and as a result we peek out of the box and see what lies beyond.

New tools are introduced to those who attended the first workshop in the series in June.

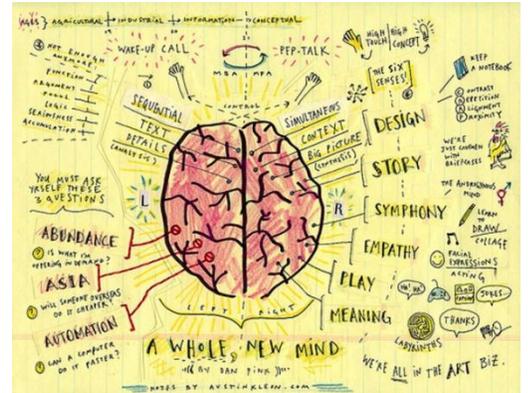

Bring your favourite tea and biscuits to share!

The workshop will inspire you to awake the functions of the 'right side' of your brain and to develop an attitude of 'out of the box' thinking. The workshop can also support you to start approaching problems in a completely different and new way. Furthermore, it can help you to reconnect with the child within who has no inhibitions, who is full of imagination, playfulness, and effervescence.

Ultimately, the aim of the workshop is to extend our vision of 'what is', to learn to see beyond the apparently visible.

During the program we offer tools in order to encourage participants to learn how to awaken the 'right side of their brain' (functions of the right hemisphere) and to balance it with the left side creating harmony between the two.
